

## Overview

Modjeski and Masters is a nationwide leader in the design, inspection, and rehabilitation of all bridges types, including long-span and movable structures. The firm primarily serves state transportation departments, port and turnpike authorities, and railroads. Additional lifecycle services include: field instrumentation and nondestructive testing, bridge security and vulnerability analysis, vessel collision analysis, scour analysis, suspension bridge cable and suspender investigations, fatigue evaluations, emergency evaluations and forensic studies, seismic evaluation and design, and bridge research/code/course development.

## Our Promise

We think success begins with a strong, personalized service relationship. We believe that developing a long-term relationship with you - a relationship built on trust, innovation and value - leads to great work, great bridges, for you, your organization and the communities you serve.

As our client, we vow to make your life easier; to do things right the first time; and strive to exceed your expectations. When you work with us, you can expect:

- **The highest degree of integrity and ethical standards.** We're accountable for our work, we meet commitments and we always do the right thing for our clients. Earning your trust means everything.
- **A collaborative dialogue and direct, anytime access to our technical experts.** No layers to work through. No "gatekeepers" limiting communication. We embrace our clients as visionaries. Our solutions make your visions real.
- **Technical excellence and innovation - driven by function and value.** We have extraordinary engineers - who bring incredible focus. They solve complex problems with solutions that are innovative, cost effective and environmentally sound.
- **Comprehensive, lifecycle bridge services.** We work with you to implement solutions for the long term. We visualize and design. We help construct and maintain. Our goal is to serve as your single point of contact for the entire life of the structure.

From small projects to large, complex engagements; from practical design to innovative, smart infrastructures, you can count us to be agile; to scale our teams and efforts to projects of any size and complexity.

The relationship we build with you is the product of our people, systems and culture, which are dynamic and have been created over our many years in the bridge business. We believe that success means staying true to our simple professional beliefs: trust, innovation and value. It's how we turn challenges into opportunities. It's how we help build and maintain great bridges.
